Preface

The Annual Statistics provides material descriptive of the population of Manitoba. It includes statistics on the operations of the Health Programs such as Healthy Child Development, Home Care, and Mental Health Programs. The utilization of hospital, medical, chiropractic, optometric, oral surgery, Pharmacare, and long term care services by residents of the province during the fiscal year April 1, 2001 - March 31, 2002 are also included. Some material on services pertaining to 2000/2001 and earlier years are included to permit comparison of one year to another.

The Regional Health Authorities have been actively involved in planning for the health service delivery for residents in each region of Manitoba. Where possible, statistical detail is provided by regional health authority.

The tables should be read in conjunction with the notes that precede the data in each Section. As well, the footnotes to the individual tables are important for a better understanding of the data.

The Health Information Management Branch of Manitoba Health has prepared this publication. Any inquiries pertaining to this publication in general or to individual tables should be addressed to:

Population

Part 1

The **population** data in this section are based on records of residents registered with Manitoba Health on June 1, 2001.

On April 1, 1996, the Province of Manitoba converted the Health regions to Regional Health Authorities. This resulted in a shift of boundaries and a change in how the different local districts are distributed. First Nation residents are now being allocated to their municipality by postal code. Therefore, historical comparisons of regional data prior to 1996/1997 are not possible.

Hospital and Community Services

Part 3
Section 1

The information contained in this section is derived from the Admission/Separation Abstracts reporting forms.

Tables 1 - 10 are based on the Admission/Separation Abstracts and include data for those residents of Manitoba who were separated from hospitals during the period April 1, 2001 - March 31, 2002. An Admission/Separation Abstract is completed and submitted for each separated patient by all Manitoba hospitals and by hospitals outside of Manitoba providing services to insured residents of Manitoba.

In reviewing the data in this section the following definitions will be helpful:

Acute Care Hospital - A hospital that provides primarily for the diagnosis and short-term treatment of patients for a wide range of diseases or injuries.

Rehabilitation and Chronic Care Hospital - A hospital that provides primarily for the treatment of patients requiring rehabilitation therapies and for the continuing treatment of patients with long-term illness or with little or no potential for recovery and who require equipment and professional supervision not usually provided in a personal care home.

Set Up Beds and Cribs - The number of beds and cribs that are set up, as at March 31, for patient accommodation by a hospital.

Separations - The discharge or death of an in-patient from a hospital. The frequency counts show individual cases separated, not unique persons separated.

Separated Days - The accumulated in-patient days since admission of adults, children, and newborns, who were discharged from the hospital or who died in the hospital during the reporting year, including those admitted in previous years.

Length of Stay - Separated days per separation.

Rate Per 1,000 Population - Calculation is based on Table 1 in the Population Section, unless otherwise stated.

Diagnostic Classification/Category - Based on International Classification of Diseases, 9th Revision, Clinical Modification (ICD-9-CM).

Section 2

The information contained in this section which relates to **medical, chiropractic, optometric, and oral surgery services** is based on claims submitted by physicians, chiropractors, optometrists, and oral surgeons for residents of Manitoba. Data for services which are not insured under the Manitoba Health Services Insurance Plan, whether they are for residents or non-residents, are excluded from this section.

Some of the tables in this section pertain to services rendered by physicians as well as other health practitioners while other tables are restricted to services provided by physicians.

A number of tables show physicians counts for those receiving in excess of $50,000 from Manitoba Health, by type of practice.

Table 2A (Continued)
Average and Median Payments ($50,000 Gross) (1) to Physicians by Specialty of Practice - 2000/2001 and 2001/2002

(1) Amounts represent gross payments by Manitoba Health from which the physicians must pay overhead costs. Payments are made directly to health practitioners, as well as payments to patients where the health practitioner has "opted-out" of the Plan. The Average Payments exclude remuneration from the University of Manitoba to geographic full-time clinical teaching staff. Top-ups to selected specialties totalling $6.5 million in 2000 /2001 and 2001/2002 are excluded. For Radiology, the Average Payment represents professional services only and includes salary and contract payments made through hospitals. The Average Payment for Physical Medicine, Anesthesia, Psychiatry and Internal Medicine-Geriatrics also includes payments made by hospitals. For health practitioners (except Radiology, Physical Medicine, Psychiatry, Anesthesia and Internal Medicine-Geriatrics), all other income from hospital contracts, uninsured services, non-residents, Worker's Compensation, etc. is excluded. Payments made for laboratory services to registered facilities are excluded, as it is not possible to separate the technical and professional components. Payments made to physicians for the Professional Liability Insurance Plan (PLIF) are also excluded. The PLIF payment for 2000/2001 and 2001/2002 was $4.5 million each year. Payment made to the Breast Health Program in the amount of $358,171 is excluded.

(2) Neurosurgeons were each remunerated an average of $306,400 in 2000/2001 and $307,954 in 2001/2002 as per the Neurosurgery Funding Agreement.

(3) Prior to the recalculation of the average income, lump sum payments made to groups of radiologists providing services to various locations throughout Manitoba were allocated on a prorated basis.

(4) Effective October 1, 1999, UltraSound and MRI services were remunerated under the fee for service program. Prior to this date, UltraSound and MRI were compensated through the facilities' budgets through memorandums of agreement. However, many rural facilities only started submitting fee-for-service claims in the 2001/2002 fiscal year.

(5) One pathologist is registered as an internist, but his practice is primarily as a director of a laboratory being recognized by the College of Physicians and Surgeons as a specialist in laboratory medicine.

(6) Average and median are not calculated because it is not possible to separate the technical and professional components.

(7) Includes Brandon and Winnipeg.

(8) Rural general practitioners earned an additional $15.81 million in 2000/2001 and $15.82 million in 2001/2002 through the Rural Emergency Room Agreement.

(9) Excludes Pathology.

Table 2B(1) (Continued)
Average and Median Payments {1/2 the Mean Threshold (2)} to Physicians by Specialty of Practice - 2000/2001 and 2001/2002

(1) The conditions stated in Table 2A also apply to Table 2B.

(2) Derived by computing the average income for all physicians within a bloc claiming at least one dollar through the fee-for-service arrangement in the fiscal year and dividing by two. If the threshold calculated for a specialty is less than 80% of the provincial threshold ($64,154 for 2000/2001 and $69,627 for 2001/2002), the provincial threshold is substituted as the specialty threshold. One half the mean threshold allows for difference in income levels between specialties and gives a more accurate picture of the average and median incomes of full-time physicians.

(3) All physicians excluding pathologists, receiving Manitoba Health payments.

Pharmacare Program

The Pharmacare Program protects Manitobans from financial hardship resulting from expenses of **prescription drugs**. On April 1, 1996 an Income Based Pharmacare Program was introduced. Deductibles are based on 2% of adjusted income for families earning $15,000 or less per year and 3% for those earning over $15,000 per year. A minimum deductible of $100 is applied to all clients.

In 2001/2002 an average of 29 prescriptions were dispensed to each person who received benefits from the Pharmacare Program and an average of 42 prescriptions were dispensed to each family unit that received benefits.

The statistical tables are derived from Drug Program Information Network (DPIN)-Pharmacare prescription records for residents who applied to Pharmacare, met their deductible and received benefits.
